

# All Summer Long – Kid Rock

INTRO: D C G

          D C                          G  
It was 1989, my thoughts were short my hair was long  
D                          C                          G  
Caught somewhere between a boy and man  
D          C                          G  
She was 17 and she was far from in between  
          D                          C                          G  
It was summertime in Northern Michigan

INTRO

          D                          C                          G  
Splashin' thru the sandbar, talkin' by the campfire  
          D                          C                          G  
It's the simple things in life like when and where  
          D                          C                          G  
We didn't have no internet, but man I never will forget  
          D                          C                          G  
The way the moonlight shined upon her hair

CHORUS:

          D                          C                          G  
And we were tryin' different things and we were smokin' funny things  
          D                          C                          G  
Makin' love out by the lake to our favorite songs  
          D                          C                          G  
Sippin' whisky out the bottle not thinkin' 'bout tomorrow  
          D                          C                          G          D C G  
Singin' sweet home alabama all summer long  
          D                          C                          G  
Singin' sweet home alabama all summer long

          D                          C                          G  
Catchin' walleye from the dock watchin' waves roll off the rocks  
          D                          C                          G  
She'll forever hold a spot inside my soul  
          D                          C                          G  
We'd blister in the sun we couldn't wait for night to come  
          D                          C                          G  
To hit that sandy place of rock 'n roll

CHORUS

SOLO

          D                          C                          G  
Now nothin' seems as strange as when the leaves began to change  
          D                          C                          G  
Oh how we thought those days would never end  
          D                          C                          G  
Sometimes I hear that song and I'll start to sing along  
          D                          C                          G  
And think man I'd like to see that girl again

CHORUS (2x)

INTRO
